

## E-MAIL DISTRIBUTION WITH VERSATILE ADDRESS REMOVAL

### ABSTRACT

One or more special fields are added to an e-mail message. The one  
5 or more special fields are used to specify addresses to be removed from  
address fields in preparation for sending the message. The special fields  
may include any combination of the following fields: a field used to specify  
addresses to be removed from a "To" field, a field used to specify addresses to be  
10 removed from a "Cc" field, a field used to specify addresses to be  
removed from a "Bcc" field, and a field used to specify addresses to be  
removed from all address fields.
